

TRI-BUILT® VALLEY FAST 100

USES & DESCRIPTION

TRI-BUILT® Valley Fast 100 is a multipurpose fiberglass reinforced sheet coated with a technologically advanced SBS formulation. Only the highest quality asphalt and polymers are used to make our new TRI-BUILT® Valley Fast 100 product. The result is a membrane that is highly pliable, very durable, and extremely versatile.

TRI-BUILT® Valley Fast 100 has higher tensile strengths and greater waterproofing capabilities when compared with your typical asphalt saturated organic felts. TRI-BUILT® Valley Fast 100's high degree of versatility makes it an excellent choice for use under metal, composition shingles, and shake applications.

SPECIFICATIONS

Approximate Thickness	55 Mils	ASTM D-5147
Tensile Strength	MD=45, CD=45	ASTM D-6163 Type 1
Tear Strength	Pass	ASTM D-6163 Type 1
Dimensional Stability	Pass	ASTM D-6163 Type 1
Pliability @ 77 °F	Pass	ASTM D-4601
Liquid Water Transmission Test	Pass	ASTM D-4869
Moisture Vapor Permeability	0.1 U.S. Perm or less	ASTM D-1970
