

TRI-BUILT® PRE-ASSEMBLED PLASTIC CAP

PRODUCT DESCRIPTION

Nails: steel, electro galvanized for additional corrosion resistance, with diamond point and round annular grooved ring-shank for increased holding power.

Plastic Cap: large round plastic head is ideal for holding roofing felts, other roofing materials, sheathing and other building components in places that are prone to tearing when attached with a regular nail.

DIMENSIONS

Nail Length: 7/8", 1", 1-1/4", 1-1/2", 2"
 Nail Diameter: 12 Gauge
 Cap Diameter: 1"

FEATURES

- Strong outer rim for increased rupture values
- Minimizes the heat sinking effect of metal to the building materials
- Annular ringed shank for additional pull-out resistance
- Easy installation and use
- Round head will not puncture roof membrane
- Meets the requirements of ASTM F1667-13

PULLOUT RESULTS (AVERAGE)

Average Resistance (lbs)	Smooth Shank	Annular Grooves
1/2" Plywood	81	155
3/4" Plywood	99	224
2" Pine Boards	67	190

FINISH Electro galvanized (standard)

USES

- Roofing Felt Fastener
- Board Insulation Fastener
- Insulative Sheathing Fastener
- House Wrap Fastener
- Base Sheet Fastener
- Structural Sheathing Fastener
- Radiant Barrier Fastener
- Vapor Barrier Fastener
